

STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

Applicants' representative, (Arthur) Tan-Chi Yuan, thanks the Examiner San Juan and Supervising Examiner Barron for the courtesy of a telephonic interview on October 2, 2008. The Applicants discussed and explained that the cited reference, Wray, fails to disclose or suggest each and every element of the invention because embodiments of the invention attempt to use a separate communication channel, such as an e-mail protocol, to exchange a digital object and that digital object is used for establishing a secure communication channel under a different communication channel. Examiner Barron requests the Applicants to clarify the claims further to illustrate the distinguishing features and Examiner San Juan requests the Applicants to identify supports from the specification. Both examiners agree to reconsider the amendments and arguments to the filed. No exhibit was shown.
